- **High School Diploma in Computer Science 2022**
El Haouaria High School
- **Bachelor's Degree in Information Technology 2024-2025**
Specialization: Information Systems Development
- **Engineering Degree in Computer Science (ongoing)**
National School of Engineers of Carthage (ENICarthage)

CERTIFICATIONS

- Microsoft C# Fundamentals Certification
- Back-End Development and APIs Certification – freeCodeCamp
- Career Essentials in Software Development Certification – Microsoft & LinkedIn

LANGUAGES

- Arabic: Native
- French: Intermediate
- English: Intermediate
- Italian: Beginner (A1)

EXPERIENCE

Full Stack Developer – Universe Project 2025–2026

Design and development of a web platform dedicated to centralizing opportunities in Tunisia (final-year internships, work-study programs, competitive exams, and job offers etc) to support students and young graduates. The platform was developed using Node.js, Express.js, and MongoDB on the server side, React.js on the client side, and hosted on AWS. Available at : <https://www.universe.tn>

Final-Year Internship – Arzaak Company 2024–2025 (3 months)

Design and implementation of an e-learning platform for learners, trainers, and recruiters, developed using the MERN stack architecture and hosted on AWS. The project aims to improve access to online training and enhance interaction between different users. Available at: <https://arzaak.tn/authors>.

Mobile Application Development – Mon PFE 2024–2025 (1 month)

Design and development of a mobile application named “Mon PFE”, aimed at facilitating the search for final-year internships (PFE) in Tunisia. The application was developed using Flutter, offering a simple and intuitive user experience for students. GitHub repository: <https://github.com/AbdallahBS/Mon-PFE>

Professional Internship – Kube Kloude Company 2024–2025 (1 month)

Development of a dashboard to monitor company services and facilitate communication with clients, using React for the front end, Node.js and Express.js for the back end, and CouchDB for data storage. Additionally, designed and developed a corporate showcase website to enhance the company's public visibility using HUGO technology.

INTRODUCTORY INTERNSHIP – AMRSHOP 2023–2024 (1 month)

Design and development of a product sales management system integrated with a point-of-sale (POS) terminal to facilitate in-store sales, using the MERN stack. GitHub repository: <https://github.com/AbdallahBS/mern-commerce>

TECHNICAL SKILLS

- Backend Development: Python, Java, C#, C++
- Databases: MongoDB, Firebase, PostgreSQL
- DevOps & Cloud: AWS, Docker, pipelines CI/CD
- Mobile Development: React native Flutter
- Web Development: MERN, Angular, WordPress
